

GLOBAFOAM®

Waterless whole-body cleansing foam

The full body cleansing foam for waterless cleaning has been specially developed for daily hygiene. Contains natural lactic acid from the lacto-intensive active complex, that support and protect the natural state and pH balance of the skin. Ensures freshness and prevents unpleasant odors.

Product properties:

- colourant- and alcohol-free
- hypoallergenic
- silky composition
- balanced pH
- doesn't irritate the skin
- very good cleansing properties
- doesn't require rinsing
- compared to similar products, foam doesn't flow over the cleansing glove
- for external use only!

USAGE

GLOBAFOAM® is a foam used for whole-body cleansing without water.

GLOBAFOAM® cleanses, protects and restores even the gentlest and most tender skin. It is ideal for frequent whole-body skincare procedures. The pleasant foam cleans and cares the soiled and highly stressed skin and protects it from dehydration.

It suitable for use in bedridden patients for the prophylaxis of decubitus and during gynecological or urological treatments, as well as after childbirth.

GLOBAFOAM® is suited in cases of incontinence and colostomy.

Gently shake the bottle before use. Apply a small amount of GLOBAFOAM® to a disposable cloth or a skincare mitten and cleanse the body area. Whilst cleansing the perineal region, be sure to cleanse from front to back.

It does not require rinsing with water or drying.

STORAGE

Use within 9 months after opening. Store at room temperature, keep away from direct sunlight and avoid freezing to assure the quality of the product.

UTILIZATION

Product is ecologically safe, all active ingredients are biodegradable in flush water. Plastic packaging materials are recyclable. For collection, the plastic packaging is suitable when rinsed, the bottle and cap separated. The pump with its metal parts is also suitable for plastic collection. The packaging box is sorted for cardboard collection. The compatibility of the packaging and the product is quality assured.
